IntelEDI

IEOB

IEOB · PAPER CONVERSION

Paper in. Electronic out.

Most payments arrive electronically. Some still arrive on paper, and someone keys every line. IEOB takes that work off the desk and turns paper into the same file format your system already posts.

TODAY

Paper still arrives. Someone still keys it.

Paper EOB arrives
Lockbox or mailroom

Keyed by hand
Line by line

Slow and error-prone
Every day

WITH IEOB

From image to standard 835.

STEP 1

Receive images
Scanned EOBs and remittance images.

STEP 2

Read every line
Payer, patient, claim and every adjustment.

STEP 3

Check against the 837
Your original claim file.

STEP 4

Produce an 835
The same format your system already posts.

Illustrative example.

WHAT YOU GET

What can't be read is flagged, not guessed.

- Low-confidence items are flagged for a person, with the reason
- Payer correspondence that is not a payment is categorized and routed for follow-up
- Your team reviews exceptions instead of typing every page
- Paper becomes one more electronic file in the same process

Fits what you have. Works with the lockbox, bank and billing system you already use.

Modular by design

IEOB is one of six IntelEDI solutions. Add others when you are ready: IHUB · IREMIT · IERA · IVAULT · IDATA.

See it run on your own files
