IntelEDI

IVAULT

IVAULT · DOCUMENTS

Every document, with a status and a name on it.

Not everything a payer sends is a payment. Letters, records requests and denial notices arrive every day, land in a shared drive or an inbox, and nobody can say who has them. IVAULT gives every document a place.

TODAY

Documents arrive. Then they disappear.

- **Correspondence arrives**
  Letters, requests, notices
- **Shared drive or inbox**
  Wherever it lands
- **No owner, no status**
  Was it handled?

WITH IVAULT

Categorized, routed and tracked.

STEP 1

Receive
From the lockbox, the mailroom or a scan.

STEP 2

Categorize
Into the categories your team defines.

STEP 3

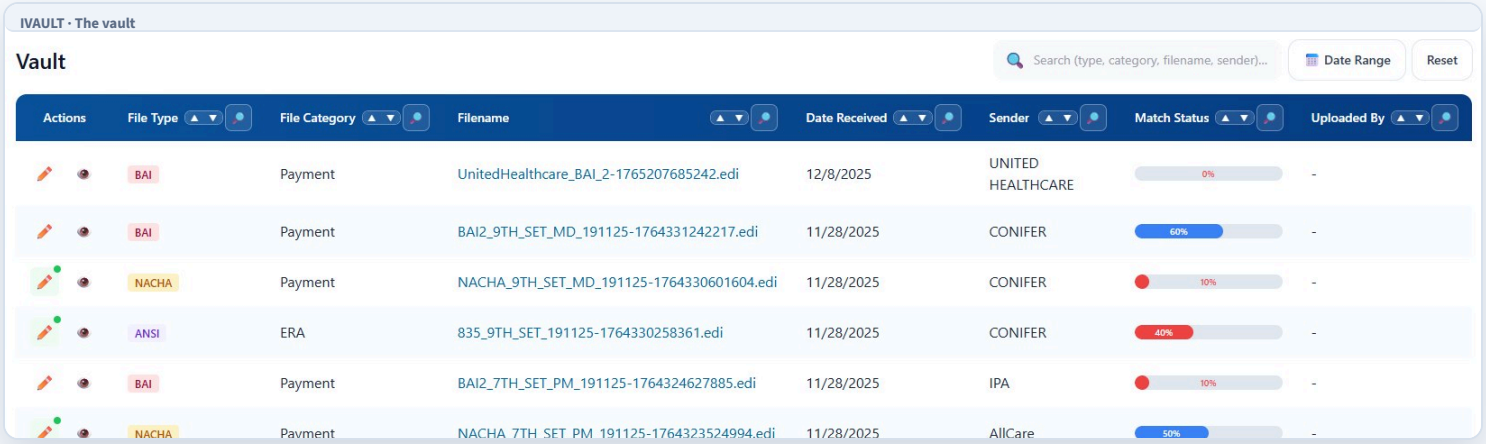

Route
To the right queue.

STEP 4

Track
From new, to in progress, to completed.

SEE IT

The vault.

1. **Every file received, kept and searchable**
2. **Type, category, sender and date on each one**
3. **Match status beside every file**

WHAT YOU GET

A record you can stand behind.

- A note is required on each change, with a name and a time
- Access is set by role, so outside partners see only what you allow
- Import dates show how long an item has been waiting
- Documents stop getting lost

Fits what you have. Works beside the lockbox and the systems you already use. Nothing is replaced.

Modular by design
IVAULT is one of six IntelEDI solutions. Add others when you are ready: IHUB · IREMIT · IERA · IEOB · IDATA.

See it run on your own files
